

BeLight Software is an innovative Mac development company based in Odessa, Ukraine. In 6 years on the market, the company gained numerous rewards for producing powerful and easy-to-use Mac applications. Specifically, BeLight Software targets DIY niche offering high-productive print programs – Business Card Composer, Swift Publisher, Labels & Addresses and Disc Cover. Image Tricks is a freeware image editor released by BeLight. Printfolio is a solution for creating various printing projects, including five applications from BeLight. Art Text makes high quality textual graphics – headings, logos, icons, buttons, banners, similar things. Get Backup is a simple and efficient backup utility for creating personal backups. Live Interior 3D opens a new product line dedicated to interior design:

BeLight Approach

At BeLight, we prefer “to dot the i’s and cross the t’s” manually. As a result, our applications are hand-crafted ones.

For example, here is a shortened list of what we do:

- We do sort images for applications by hand
- Our programmers test every feature till it behaves intuitively
- To test all the printing features we waste a lot of paper and ink cartridges
- We regularly provide free updates containing a lot of suggestions and options, required by our customers
- We offer free tech support

Final result: convenience, quality and reasonable price.

What is BeLight?

In our name "BeLight Software" the word "Light" signifies “clear, smart and bright”.

Our company brights light to our users, because our products are smart, bright and easy to understand.

BeLight Product Line:

Business Card Composer is the award-winning software for creating and printing out business and hobby related cards in a few minutes:

<http://www.belightsoft.com/composer/>

Labels & Addresses (former Mail Factory) is an office tool for designing and printing envelopes, address labels and shipping labels:

<http://www.belightsoft.com/labelsaddresses/>

Swift Publisher is a page layout application for designing and printing colorful flyers, newsletters, brochures, booklets, letterheads, etc:

<http://www.belightsoft.com/swiftpublisher/>

Disc Cover is a tool for designing and printing covers and labels for CD, DVD and other media:

<http://www.belightsoft.com/disccover/>

Printfolio is a solution for creating various printing projects: business cards, CD/DVD art, flyers, brochures, newsletters, catalogs, address and shipping labels. It includes all BeLights' programs (Business Card Composer, Labels & Addresses, Swift Publisher, Disc Cover, Art Text plus Image Tricks Pro) and provides complete integration that allows you to exchange data between the programs:
